

Hoisting Solutions and BirdLife Botswana Crane Fund

The creation of this fund was instigated by Messrs Hoisting Solutions and avidly accepted by BirdLife Botswana under their Species Champions programme. It is an outstanding idea which we appreciate very much indeed and will go some way to protecting endangered cranes as well as other rare bird species.

The fund was established based on a percentage of the work performed by Messrs Hoisting Solutions, who also encourage their clients to match their donations to the Fund. The fund is controlled by BirdLife Botswana and the finances engendered will be used to further the conservation of the three species of Cranes found in Botswana, namely Wattled, Blue and Grey Crowned, three magnificent species. Botswana is home to more Wattled Cranes than any other country. Donations are made by Hoisting Solutions, their customers, other crane companies and their customers and the general public into this Fund.
